

Mobility in Field Operations

Partnering with Technology for Heightened Field Operations

Well-equipped control rooms help public safety officials effectively address and prevent crime. Whether it's to manage day-to-day special operations, oversee homeland security efforts, or respond to an emergency event, officials rely on control room technology to protect the communities they serve.

Navigating through big data, multiple video streams, and computer data from one or more jurisdictions requires the latest in video wall and image processing solutions. SYNNEX can help with these solutions, enabling public safety officials to greatly maximize the efficiency and performance of their control rooms.

Benefits

- Personnel efficiency (cameras patrolling multiple areas without placing numerous officers on the beat)
- Enhancement of enforcement efforts and public security (officer and public safety)
- Increase operational awareness and responsiveness
- Improve management and protect lives supporting emergency and disaster management programs
- Enhances information sharing, personnel allocation, and centralized multiple source data management
- Provides big data visualization and real-time monitoring

Listen for These Common Mobility Requests

- I want cameras in public spaces within my jurisdiction.
- I want to utilize technology solutions for personnel efficiency.
- I want to enhance my ability to manage homeland security or natural disaster events.
