GUIDANCE G SOFTWARE ™

UPGRADE YOUR INVESTIGATIVE POWER WITH ENCASE® ENDPOINT INVESTIGATOR - EXTERNAL INVESTIGATIONS

From cyber-crime to insider trading, digital investigators are increasingly being asked to handle investigations of all kinds often involving multiple people located across multiple offices and geographic regions. Built on the same technology as EnCase Forensic and deployed on more than 20 million endpoints, EnCase Endpoint Investigator - External Investigations is helping numerous law-enforcement and government agencies as well as 65 of the Fortune 100 do just that every day.

Features

- Affordable price for industry-leading technology
- Broad support of major operating systems and file systems
- Easy, scalable deployment of servlets to as many target machines as needed
- Enables RAM or volatile data searches
- Can search unallocated space for deleted data
- SAFE operates on standard laptop or desktop system
- Requires no expensive back-end database

Why Upgrade to EnCase Endpoint Investigator - External Investigations from EnCase Forensic?
Forensic investigators around the world trust EnCase Endpoint Investigator - External Investigations to:

- Investigate computers remotely from an Examiner machine
- Conduct investigations on multiple computers simultaneously
- Preview and collect data discreetly and in a forensically sound manner
- Perform investigations securely and with a detailed audit trail

The Most Powerful and Easy-To-Use Remote Investigations Solution
Easily installed in about an hour, EnCase Endpoint Investigator - External Investigations gives your team everything you need to immediately and thoroughly search, collect, preserve, analyze, and report on data from servers and endpoints anywhere on a network from one or multiple Examiner machines—without user disruption or system downtime.
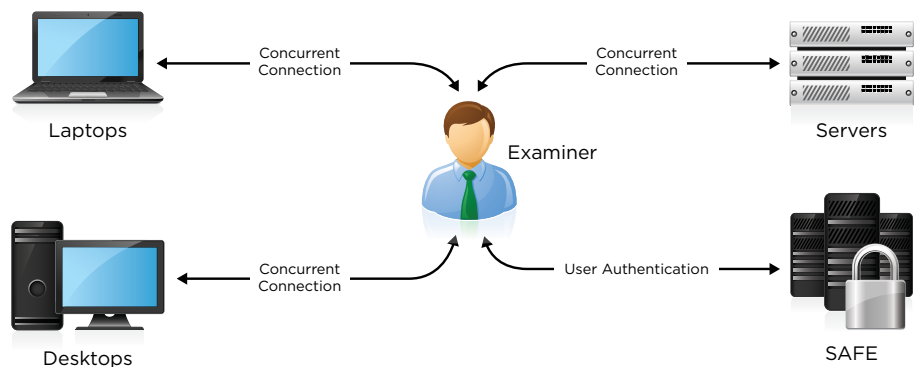

Concurrent case management views enable greater speed and efficiency.

With EnCase Endpoint Investigator - External Investigations, you can readily:

- Preview and collect data from multiple machines simultaneously
- Search multiple machines simultaneously using Sweep Enterprise functionality
- Conduct investigations discreetly, without alerting users
- Capture volatile artifacts only in live RAM with snapshot functionality
- Manage investigations and access through SAFE
- Document investigations with audit trail

Efficiently Capture Potential Evidence from Volatile Data

The Snapshot feature in EnCase Endpoint Investigator - External Investigations gives you the ability to readily capture and analyze volatile artifacts only resident in live RAM from target machines—even from multiple target computers simultaneously. This unparalleled visibility accelerates the identification of anomalies, which can be critical when investigating computer security incidents. Snapshot quickly captures volatile data to reveal details about open ports, running processes, and other crucial information.

Simplify Management of Multiple Cases

EnCase Endpoint Investigator - External Investigations is geared for the busy investigator, offering you the most powerful case-management features on the market.

With EnCase Endpoint Investigator - External Investigations, you can:

- Share Findings: Make case information viewable by more than one investigator at a time.
- Manage Cases Concurrently: EnCase Endpoint Investigator - External Investigations lets you review data from more than one case at a time, simplifying case-comparison analysis functions like keyword searches, search hits review, etc.
- Automate Processing and Indexing: Spend more time analyzing and less time on processing and indexing.

Key Differences between EnCase Forensic and
EnCase Endpoint Investigator - External Investigations

Capability	EnCase Forensic	EnCase Endpoint Investigator
Remote forensics: One connection at a time	Yes	Yes
Remote forensics: Multiple concurrent connections	No	Yes
Quickly sweep ranges of devices	No	Yes
Centralized user account management	No	Yes
Comprehensive audit capability	No	Yes
Robust "Check-in" connectivity support (VPN user, mobile user)	No	Yes

About Guidance Software (NASDAQ: GUID)
We exist to turn chaos and the unknown into order and the known—so that companies and their customers can go about their daily lives as usual without worry or disruption, knowing their most valuable information is safe and secure. Makers of EnCase®, the gold standard in digital investigations and endpoint data security, Guidance provides field-tested and court-proven applications that have been deployed on an estimated 25 million endpoints and work in concert with several other leading enterprise technologies.
